

## Spotlight on..... Middle School Math

Mr. Chris England  
5th & 6th Grade Math

Miss Sarah Carlson  
7th & 8th Grade Math

## Academic Excellence Through Rigor and Relevance

Beginning in 5th Grade, our curriculum teaches high performance (HP) level math. Collaborative teaching and individualized attention creates an environment where all students can be successful.

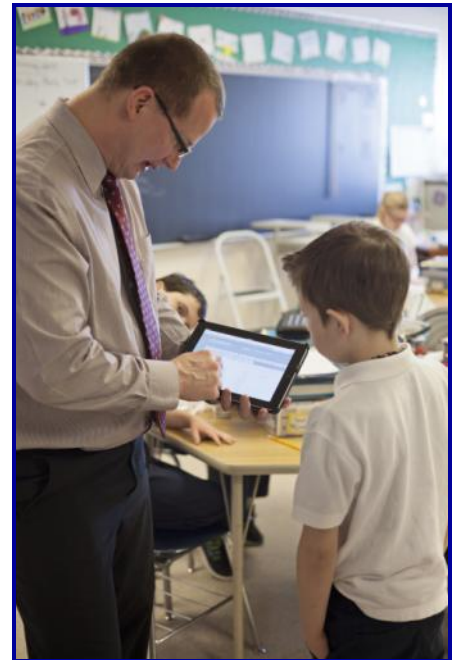

5th Grade: Fractions & Decimal Operations.

6th Grade: Introduction to Algebra & Integers

7th Grade: Pre Algebra & Geometry

8th Grade: Algebra 1 & Quadratics

We challenge our students to develop the knowledge, skills, and work habits necessary to excel in high school & beyond. We believe an academic balance creates a well rounded, 21st Century thinker. Our students are confident in mathematics because they are encouraged to learn from their mistakes & offered extra instruction to help them succeed. Many of our students test into Geometry or HP Geometry their freshman year of high school.

**Individualized Attention**  
**Flipped Classrooms**  
**1:1 Computer Access**  
**Integrated with Faith**  
**Team Based Learning**

"I am in Geometry....and it almost seems too easy! Thank you for all that you did for me!"

Grace, 2013 St. Vincent de Paul Graduate
